DESCRIPTION

A Rare and likely never to be repeated opportunity to own this completely original time capsule. Finished in black with red coach line this 2.0-litre Sierra is in top-of-the range Ghia specification, with its ultra low mileage of only 13,300 miles is supported by its accompanying history file, Which includes original purchasing invoice from Invicta Motors (Kent) showing supply of the car + mud flaps, rubber mats, and dealer fit tow bar. MOT certificates dating back to 1994 to current November 2024, Original supplying dealer rear window sticker, dealer number plates, with the car spending some years off the road, the previous keeper has owned the Sierra since 2015 and, during that time, has covered only around 1200 miles, always benefiting from being garaged when not in use, evident from the excellent condition of the car. Registered in November 1991, and having only had three registered keepers in that time, the car does benefit from a current MOT to November 2024, we have completed a full fluids & recommission service, naturally running and driving without fault. Checkout our other fabulous future classic selection on our website. Documentation with the Sierra includes the V5C, original book pack with owner's handbook, radio code, audio instructions and service book. However, this only has two stamps at 1224 miles in November 1992 and 12,116 miles in May 2016. There's also the original bill of sale (for £14,800) plus some bills and MOT certificates from throughout the car's
