DESCRIPTION

The car looks fabulous in Beautiful Pentland Green over Sandstorm leather, with wooden centre dash and door cappings. This is the upgraded 2007 variant with enhanced interior and better ride. The car is fitted with 19" 15 spoke Alloy wheels, satellite navigation, H I D headlights, Linn 950 W audio system, bright finish grille, heated seats, heated front screen, auto dim rear view mirror, Front and rear parking sensors, front and rear cameras, cruise control, Apple Carplay upgrade to allow use of Google maps etc on the standard screen, silver brake callipers, anti-misting kit fitted to headlights, air conditioning. The car has a full Aston Martin service history throughout, mostly with HWM in Walton On Thames. This car is in excellent condition and has been very well maintained. It has benefited from regular use and has proved very reliable in my ownership. Supplied with battery conditioner. The car is kept in a dehumidified garage. Optionally available bespoke green indoor car cover. Personalised number plate included with the car. I have added a couple of photographs showing the aerodynamic undershield and the amazingly good condition of the chassis. This car is in even better condition that I gave it credit for.
